How the study was conducted:

- 2,184 total interviews
  - 931 phone
  - 1,253 online
- Adults age 18 and older:
  - 1,195 Hispanic women
  - 373 Hispanic men
  - 302 White women
  - 314 White men
- Interviews conducted 2/11/21 - 2/25/21
How the study was conducted:

- National sample of Hispanic women
- 1,195 total interviews
  - 559 phone
  - 636 online
  - 734 conducted in English
  - 461 conducted in Spanish
- Minimum quota of 175 interviews set in Arizona, California, Florida, and Texas
- Hispanic women sample weighted to population statistics by age, region, country origin, U.S. born/foreign born, and education
Hispanic women: (Language spoken in household)

- Spanish and English equally: 32%
- Mostly Spanish but some English: 22%
- Mostly English but some Spanish: 17%
- Only Spanish at home: 16%
- Only English at home: 13%

Base: Gave a response (<1% did not give a response)
Hispanic women: (U.S. Citizenship)

- U.S. Citizen: 76%
- Not a U.S. Citizen: 20%
- Prefer not to answer: 4%
Hispanic women: (U.S. Citizen households)

- Everyone in household is a U.S. Citizen: 63%
- Mixed U.S. citizen and non-citizen household: 27%
- No one in household is a U.S. Citizen: 5%
- Prefer not to answer: 5%
Hispanic women: (Country of nativity)

- Born in Puerto Rico: 4%
- Born outside of the U.S.: 48%
- Born in the U.S.: 45%
- Prefer not to answer: 3%
Hispanic women: (Generation)

- Born outside of the U.S. or born in P.R.: 52%
- Second generation: 25%
- Third generation +: 20%
- Prefer not to answer: 3%

**Second generation**: At least one parent born outside the U.S. or in P.R.
**Third generation**: Both parents born in the U.S.
Hispanic women:
(Education)

- No college degree: 78%
- College degree: 19%
- Prefer not to answer: 3%

What ethnic identity term do you prefer? (Hispanic women)

- Hispanic: 67%
- Latina: 30%
- LatinX: 1%
- Something else: 1%
- Prefer not to answer: 1%
Key Findings
Parenting and Family

Key Findings:

- Latinas are much more likely than White women to be single parents (32% to 19%)
- Among Latinas, 68% have sole responsibility as caregiver to their children, compared to 59% among White women
- Latinas are less likely than White women to receive help from paid childcare (16 vs. 26%)
- Latina moms are much more likely to have parenting responsibilities negatively affect their careers, with 33% saying they have sacrificed career prospects for childcare reasons
- Since the pandemic began, 36% of Latinas have seen their family responsibilities increase “a lot.” This compares to 27% among Hispanic men, 22% among White women, and 21% among White men
- Among Hispanic moms in the work force, many have had to scale back hours because of childcare responsibilities – this includes 14% who have had to quit a job for this reason
Economic Effects of the Pandemic

Key Findings:

- While the Pandemic caused employment levels to decline among all four demographic groups, Latinas reported their already low level of full-time employment before Covid-19 (42%) declining to 34% at the time they were surveyed.

- Latinas are the most likely to have suffered a decrease in household income due to Covid-19, with 17% saying their incomes have decreased “a lot” and 22% saying “somewhat”

- Among Latinas, 37% say they have not recovered financially from the toll of Covid-19. This is slightly higher than Hispanic men (35%), and significantly higher than White women (25%) and White men (19%)

- A deeper look by age reveals that the pandemic has hit Latinas ages 35-54 especially hard -- 46% of Latinas in this age group say the pandemic has had a major effect on their personal finances and that they have yet to recover.

- Also hit hard by the pandemic are Latinas born outside of the U.S., with 41% yet to recover financially
Economic Effects of the Pandemic
Key Findings:

- As a result of Covid-19, Latinas are far more likely than other groups to find it difficult to afford necessities like food (36%) and are also far more likely to seek food donations for shelters and food banks (38%)
- Latinas were in a poor position to easily withstand the economic downturn, with 49% spending “most or all” of their life savings during the pandemic. This is double the rate among White women (24%) and White men (19%)
- One-quarter of Latinas have “gone into debt or maxed out a credit card” and a 24% have “missed a car, student loan, or credit car payment”
Assets and Debts

Key Findings:

- Latinas whose families tie back to Central American countries are the most likely of any Hispanic origin group to have sent remittances outside of the U.S. in the last year (39%), followed by Latinas of South American origin (29%), and Latinas of Mexican origin (23%).

- A significant number of Latinas are without a checking account (33%), without a savings account (42%), and without a 401k or other retirement account (73%). While Hispanic men look similar to Latinas on these items, white women and white men are far more likely to have all three. The proportion of those who lack access to these resources is even greater among foreign-born Latinas, with 47% lacking a checking account, 52% lacking a savings account and 79% lacking a retirement account.

- A majority of Latinas (51%) have less than $500 currently saved for emergencies or in a rainy-day fund. This lack of a personal financial safety net is significantly lower among Hispanic men (36%), White women (36%), and White men (28%). Latinas older than 55 years of age are even more vulnerable, with 45% reporting no money at all available for emergencies.
The American Dream
Key Findings:

- One-quarter of Latinas believe that either “The American Dream no longer exists” (16%), or that “The American Dream never existed” (9%)
- Foreign-born Latinas are more than twice as likely to believe “the American dream is alive and well” (29%) compared to just 13% of U.S. born Latinas
- The most important benchmarks for Latinas for reaching the “American Dream” are to be “treated equally, no matter your background” and to “create opportunities for your children”
- Latinas are the least likely to say they have already achieved “The American Dream.” (14%)
- Latinas born outside of the U.S. are more likely to say they “have already reached the American Dream” when compared with U.S. born Latinas (20% to 9%)
